Crazy Beautiful Wines

JOLIE FOLLE = CRAZY BEAUTIFUL

Region

We have been working with the same co-op in the Pays-de-la-Loire since 2014. Grapes come from multiple vineyards located in the heart of the Loire Valley, near Les Caves de la Loire.

Soil and Climate

The Valley terroir is exceptionally diverse. Consisting of sandstone, schists and volcanic rock in the West, to clay, sand, and limestone in the East. The climate typically allows for hot summers, mild winters with plenty of sun exposure.

Winemaking

Grapes are pressed immediately and kept at 41-42 °C on fine less debourbage for 8 days. The wine is then cold fermented in stainless steel tanks for 11 days.
